

#flo #inclass

1 | NC D1

know more -> think more

#question is this true?

1.0.1 | purpose of notes

for managing: - ideas - events - tasks - ourselves

personal information management we are working in a subset

apps: philosophies

1.0.2 | the club

notes :clap: club :clap: values comes from discussion kickoff, then discussion -> inspire -> discuss ect

other things: - starter kits - on philos - back to basics - note wiki - terminology? -glossary? - improvement guide matrix - current vs. like to do better - each cell is an idea to improve - systems prez

today, we are doing: the idea of ### competencies

PIM: Personal Management System

fundamental aspects of a process: - take - capture friction - modalities - interesting! #review this - viewing friction? @alb calls this preview external sources - process - compartmentalization - reference friction! - review - spontaneous/emergent insights - meta level of notes – more available with digital tools? how does spontaneous work with physical? #question - lemme search!

- share
 - disagree – this is not required.
 - albert talks about share friction. this isn't fundamental
 - * accessibility.. @taproot3.sanity.gq !

what other competencies does a PIM system require?

1. discussion time! table groups?

"spinach dumpling things"

@dylan uses item dropdown

not about gui! it's about organization ~nick

Capture friction vs. Structure

!ideaflow emergent structure

talking with nick... look into category theory!!
