

# 1 | Watson's Model

## 1.1 | Types of States

- Community
  - Ethic group, locale, etc.
- Political entity
  - Community with governmental support
- System
  - A system of 2+ communities with involvement
- Legitimacy
  - A authority point/trust anchor of a community

## 1.2 | Statutes of States

- Independent state
  - Political entity w/ ability to make independent decisions both externally and domestically (note! it could be *influenced* by others, and still be independent)
- Hegemony
  - A political entity within a system that is able to centrally *influence* the others' EXTERNAL relations
- Dominion
  - A political entity within a system that is able to centrally *influence* the other's EXTERNAL and INTERNAL relations
- Empire
  - A political entity within a system that is able to centrally *control* the other's INTERNAL and internal RELATIONS, other political entities in the system are not independent states
