More proof presentations

R vs \mathbb{R}

1 | Proof by Induction

Using Axler 2.C 10 as an example.

1.1 | Induction building blocks

1.1.1 | Base Case:

Prove for the simplest case

Prove for $\mathcal{P}_0(\mathbb{R})$.

1.1.2 | Inductive Step

Show that if case n is correct, then case $n + 1$ is also correct

Assume that it works for $\mathcal{P}_i(\mathbb{R})$, then prove it for $\mathcal{P}_{i+1}(\mathbb{R})$.
