1 | Anti-Nuclear time?

the assignment the notes

- think about how it relates to the civil rights movements (co-impact)
- individual bibliographies?

1.1 | Give earth a chance notes

- doesn't like the current history on the environmental movement in the 60's
- _____
- jump
- _____
- the root of a lot of concern was the radiation testing:
 - 'americans could not trust their own milk' because of the radioactive fallout contaminating the dairy pastures
 - there from the beginning!
- hey, also a mention [cite/t:@sputnik [KBxResearchProjectPlanningPtTwo.org][KBxResearchProjectPlanningPtTwo]]!
 - shook the sense of comfort that american's had, about war but also about the environment
- pollution was thought of as a big deal after this time period
 - push towards socialism
 - hatred towards cities
 - possible primary source: *Life* presidential interview in 1960
- johnson agenda in the wake of the new deal
- great society also had a focus on the environment
- The League of Woman Voters also played a big role
 - lobbied against nuclear *weapons*
 - * need to remember that much of the sentiment toward NW is what led to and allowed the sentiment toward NE
 - "Pure Milk [...] Not Poison"
 - very similar sentiment as towards pesticides
- this is all about nuclear weapons, not energy..
