

n *

really nice arch config: https://www.reddit.com/r/unixporn/comments/sh2lme/bspwm_levuaska_my_attempt_on_making_a_color_scheme/

good article on mathematics/quantum/index from thomas rimer: <https://quantum.country/qcvc> check this out later!

ternary operators are epic. python # python (falseValue, trueValue)[test]

"don't become a monk in a monestary" - barry, referring to note taking

github has a quickswitcher! this is a gamechanger, thx @zbuster05.

"classes of representation and how they move together" is what algebra is! ~-ted

<https://github.com/Exr0nProjects/obsidian-sage> yooooo?? @exr0n made a sick plugin! to try out.

<https://github.com/daaru00/obsidian-commander> could be interesting. would love it to show the output below the block, <https://forum.obsidian.md/t/new-plugin-sagecell/13364> style.

w/ darkreader, makes lots of ugly pages look nice

```
html {  
  /* max-width: 111vh; */  
  max-width: 78rem;  
  padding: 3em 1em;  
  margin: auto;  
  line-height: 1.75;  
  font-size: 1rem;  
}
```

modified from <https://www.swyx.io/css-100-bytes/>

python infix operators? this is sick. <http://tomerfiliba.com/blog/Infix-Operators/> essentially, of `add(add(add(5,6),7),8)`... we can write `py 5 |add| 6` with a bit of trickery.

<https://www.yourdictionary.com/equivalate> is a word! this is amazing.

#name vacuo

"the game I play is a very interesting one: it's imagination in a tight straight-jacket" - feynman

#name ilk

abstract math is "like a metaphor" - ted

<https://www.patreon.com/posts/52586182?scrlybrkr=6e7abbc0> #cool blender stuff <https://www.youtube.com/watch?v=NmZxWXeIjJI>

#stack to finish: <https://youtu.be/mTzOGXj8NN0?t=1418>

vim in browser, to try <https://github.com/glacambre/firenvim> <https://github.com/gelguy/wilder.nvim> <https://github.com/machakann/vim-sandwich> could be interesting: <https://github.com/hrsh7th/nvim-cmp> <https://github.com/akinsho/bufferline.nvim>

#cool chrome extension, <https://chrome.google.com/webstore/detail/draft-by-slite/ljkidlijlaapmiilabpldhmhelhl=en> super easy capture

"Like gods, these mathematical models were opaque, their workings invisible to all but the highest priests in their domain: mathematicians and computer scientists." (Cathy O'Neil)

#name lohah

super #cool artwork utilizing noise-based volume displacement <https://leegriggs.com/volume-mesh> can't really be done easily in blender..

procedurally generate language from arrival

super #cool things made with curl noise and flow fields!

#cool lisp interpreter in conways game of life <https://github.com/woodrush/lisp-in-life>

look into this working /w taproot: obsidian://show-plugin?id=obsidian-icons-plugin

this is crazy #cool, https://www.youtube.com/watch?v=-th6w_ZIvpA&ab_channel=BenThroop

#name for something: etude. means, a peice of music for the point of demonstration.

#cool word: grok. to understand something intuitively \ truly

could be a #name for smt: azimuth

very good scoring in this scene. use for later

Google X Moonshot. Dream job?

surreal numbering system: completely ordered class of the reals and the infinite and infinitesimal, coined by knuth and proven using conways game of life and combinatorial game theory! #cool

#cool word: beleaguered!

atlas by bicep: sick music video, would love to replicate the effect.

quick proj idea: GAN to generate kanji! dataset, here: <https://www.kaggle.com/nmambts/yumincho-kanji>

predictability horizon! #cool concept

would love to buy some silicon, either this or this.

config! <https://github.com/sainnhe/tmux-fzf>

category theory. to #review KBxSystemsofSystemsinNatureandDeepLearning#category theory

read this later! supposed to be generalization of godel's incompleteness theorem <https://ncatlab.org/nlab/show/Lawvere%27s+fixed+point+theorem>

proximal: possible #name! distal: also a good #name?

mechanical pencils! want to get: https://www.amazon.com/Al-Star-Graphite-Mechanical-Pencil-L126/dp/B000FA5EH0/ref=sr_1_1?crid=1AGSNPXV81ZUF&dchild=1&keywords=lamy+mechanical+pencil&qid=1633903922&s=office-products&prefix=lamy+mechan%2Coffice-products%2C232&sr=1-1 Or, https://www.amazon.com/Mechanical-Pencil-Roulette-Silver-M510171P-26/dp/B0040HNTVC/ref=sr_1_3?dchild=1&keywords=kuru%2Btoga&qid=1633903910&s=office-products&sr=1-3&th=1 maybe https://www.amazon.com/Black-Lacquer-Mechanical-Pencil-Black/dp/B08BZQDYT7/ref=sr_1_3?dchild=1&keywords=luxury+mechanical+pencils&qid=1633903451&sr=8-3

dismaland: besument park. by banksy. check it out.

Vox Populi: the beliefs of the majority

simplex: simple geometric shape in a given dimension? #cool concept

eom: good #name for something. means: end of sentence but it sounds cool!

defining new term: gardening, as the term for knowledge organization.

explanation of power of emergent property: "that even when the underlying rules for a system are extremely simple, the behavior of the system as a whole can be essentially arbitrarily rich and complex." ~wolfram computational irreducibility

hypergraph! edges are sets of points not connections. one model for etomolgysarus or, bipartite with roots and words or, store as one and represent subset as another.

bfs and look for number of shared.. roots? plug in for force

graph theory! i wanna take it. ~"most likely will exist next year" ~exr0n

#cool #name: orhac

analog, as something that is analogous

<div style="border: 1px solid red, width: 200px, height: 200px, background-color: red"> testing a div??

<https://jasonwarta.github.io/latex-matrix/> is very useful

lemma sort is #cool!

convecto, #name for smt means gather in latin
