## 1 | Watson's Model

## 1.1 | Types of States

- Community
  - Ethic group, locale, etc.
- · Political entity
  - Community with governmental support
- · System
  - A system of 2+ communities with involvement
- · Legitimacy
  - A authority point/trust anchor of a community

## 1.2 | Statuses of States

- · Independent state
  - Political entity w/ ability to make independent decisions both externally and domestically (note! it could be influenced by others, and still be independent)
- Hegemony
  - A political entity within a system that is able to centrally influence the others' EXTERNAL relations
- Dominion
  - A political entity within a system that is able to centrally influence the other's EXTERNAL and INTERNAL relations
- Empire
  - A political entity within a system that is able to centrally control the other's ENTERNAL and internal RELATIONS, other political entities in the system are not independent states
