$$1 \mid T^m$$
 def

Suppose  $T \in \mathcal{L}(V)$  and m is a positive integer.

$$T^m = \underbrace{T\cdots T}_{m \text{ times}}$$
 
$$T^0 = I$$
 
$$T^{-m} \text{ for an invertible map } T = \left(T^{-1}\right)^m$$

## 2 | results

## 2.1 | exponent rules work

2.1.1 | 
$$T^mT^n = T^{m+n}$$

2.1.2 
$$|(T^m)^n = T^{mn}$$
