1 | **Who is he?**

Developing DSLs for conventional algebra.

- Exhibit developer for the Exploratorium

- Soydevery

    – Gesture-based calculators
    – New approaches to algebra

2 | **New Approaches to Algebra**

- Numbers as constraint systems

- Constructive Theory: looks at systems as *constricts*

3 | **The Pitch**

- Written notation is hard and bad

- Comutational media offer interesting alternnatives

- The best way to communicate these new media maybe through games

4 | **digital-abacus.gitlab.io**

- A variable: variable number

- The operators are able to be reversed
