1 | **Watson's Model**

1.1 | **Types of States**

- Community

    - Ethic group, locale, etc.

- Political entity

    - Community with governmental support

- System

    - A system of 2+ communities with involvement

- Legitimacy

    - A authority point/trust anchor of a community

1.2 | **Statuses of States**

- Independent state

    - Political entity w/ ability to make independent decisions both externally and domestically (note! it could be *influenced* by others, and still be independent)

- Hegemony

    - A political entity within a system that is able to centrally *influence* the others' EXTERNAL relations

- Dominion

    - A political entity within a system that is able to centrally *influence* the other's EXTERNAL and INTERNAL relations

- Empire

    - A political entity within a system that is able to centrally *control* the other's ENTERNAL and internal RELATIONS, other political entities in the system are not independent states
